## Projects and Work Experiences

- 2017 - May 2018  Rayal TCP over wireless network with free-space optical and worldwide interoperability for microwave access.  
*under the supervision of Mr. Subhasis Banerjee, Visva-Bharati, India.*

## Projects and Work Experiences (continued)

- Jan - Jun 2020     SatG: a path planner for robots in a 2D grid.  
*Under the supervision of Dr. Ansuman Banerjee, ISI Kolkata, India.*  
SatG is developed based on SAT-based graph encoding. It handles multiple robot configurations. At the same time, SatG generates SMT-LIB2 constraints for obtaining a plan.
- May - Dec 2022     Building neural network models of the standard Cyber-Physical Systems (CPS) benchmarks.  
*Under the supervision of Dr. Rajarshi Ray, IACS Kolkata, India.*  
Building Feed-forward Neural Networks (FNNs) for CPS benchmarks such as hybrid automata and Simulink models. We built FNN models for systems with non-deterministic behavior and time-varying input signals. These models are the approximation of the original models and can be useful in developing the application of such systems.
